Once you have successfully completed the training program and passed a practical exam, you will be awarded the respective Bio Sculpture certificates.

Please note that certain training programs may require completion of the Professional Career Training as a prerequisite. These programs build upon the foundation established in the core curriculum.

For the Experienced and Certified Technician

Bio Sculpture Conversion Training is a 3 day course designed for qualified nail technicians with established industry experience who have previously completed professional training with another brand.

This course is designed for trained professionals who want to introduce the Bio Sculpture system into their professional treatment offering. It is not suitable for beginner nail technicians.

Training modules are adapted to existing skill level and salon experience, with a focus on natural nail treatments, Bio Sculpture Gel application, basic nail extensions, Full Cover Tips and product removal.

The Experience Kit includes essential Bio Sculpture products to support practical training and confident progression into the Bio Sculpture system.

What you will learn

- Product introduction
- Nail plate preparation and detailed nail analysis - Prescriptive approach
- Bio Sculpture Gel applications – Clear, colour and French gel overlays
- Basic silk sculpture
- Full Cover Tip application
- Fill and rebalance
