Please note that certain training programs may require completion of the Professional Career, Biogel or Evo Training as a prerequisite. These programs build upon the foundation established in the core curriculum.

On completion of the training, the newly trained technician will be able to attend as many refresher workshops as needed throughout their career to maintain and enhance application skill and technique. T’s & C’s apply.

Once you have successfully completed the training program and passed a practical exam, you will be awarded the respective Bio Sculpture certificates.

Professional Career Training

Embark on your journey with our Bio Sculpture professional training program, presented by experienced educators. Whether you’re a seasoned nail technician or a passionate newcomer, our 5 day structured course equips you with the skills and knowledge to excel.

Training modules offer each nail technician comprehensive training in tailoring treatment routines to address every client’s individual needs. These include natural nail care treatments as well as Spa product knowledge, Biogel and Evo product application, basic nail extensions, Full Cover Tips and product removal.

The Complete Career Training Kit includes all the products, tools and utensils required to start up your business. Our skilled educators will also equip you with the basic information you need to start up your own salon like costing break down, possible treatment pricing and retail options available.
